

# **Kappa Beta Membership List**

The list of Kappa Beta members that follows is comprehensive but probably not complete, even though I used six different sources to gather the names of KB brothers. It also probably contains a number of errors, especially in the assignment of classes. In quite a few instances, brothers were assigned to different classes on different lists. When this occurred, I was forced to make a judgment call. Please let me know of any errors so that I can correct them in future printings of this Membership List.
